Tour an Amazon Fulfillment Center

Make space for Girl Scouts to lead! As the world continues to become more technology-driven and today's workforce looks to science, technology, engineering, and math (STEM) for new ideas and discoveries, it is more important now than ever to harness the unique insights, skills, and potential of Girl Scouts.

So, together with Amazon, we've designed an adventure your Girl Scouts are going to love. Girls will have an opportunity to see STEM put into action in the workplace and get inspired by exploring computer science, robotics, engineering, and creative problem solving.

Tours are available to all Brownies and older, and those that complete the tour will receive a snazzy new patch.

Learn more and sign up for an in-person tour.
